Professional Summary

AI Product Manager with 8+ years building AI-enabled, data-driven, and enterprise software products. Owns the full product lifecycle for **Generative AI, LLM/RAG, analytics, and intelligent automation** solutions: discovery, vision, roadmaps, PRDs, user stories, success metrics, AI evaluation, and launch. At **Juniper Networks**, drives AI and data platform strategy including **15+ enterprise integrations**, delivered self-service reporting that **cut manual reporting effort 37%**, lifted platform engagement **28%**, and reduced rework **22%**. AI product lead of **WonderWord AI**, an AI K–5 reading coach taken from concept to **100+ beta families**. Translates customer problems into technically feasible requirements with engineering, data science, UX, and executives, and uses experimentation and product analytics to improve adoption.

Core Competencies

- **AI Product Management:** AI/ML Product Strategy, Product Lifecycle Management, Product Vision, Roadmaps, Product Discovery, Customer Research, MVP Definition, PRDs, User Stories, Backlog Prioritization, Go-to-Market, Responsible AI & Guardrails
- **Generative AI:** LLMs (GPT, Claude, Gemini, Llama, Open-Source), Prompt Engineering, RAG, Vector Search & Embeddings, AI Agents, Conversational AI, Semantic Search, LLM Evaluation Frameworks, Hallucination & Guardrail Design, Fine-Tuning vs. Prompting Tradeoffs, Model Selection (Cost, Latency, Quality)
- **Analytics & Experimentation:** KPI & North-Star Metrics, Product Analytics, A/B Testing & Experimentation, Funnel, Cohort & Retention Analysis, Adoption Metrics, SQL, Python (Pandas), Excel, Tableau, Power BI, Amplitude, Mixpanel, Google Analytics
- **Technical Product Management:** REST APIs, System Integrations, Data Pipelines & ETL, Enterprise Data Products, AI/ML Platforms, MLOps Concepts, Cloud (AWS, Azure), Databricks, Snowflake, Cloudera Data Platform, Salesforce, FastAPI, Lovable Prototyping, Data Governance & Privacy
- **Delivery & Collaboration:** Agile/Scrum, SAFe Concepts, Acceptance Criteria, Release Planning, UAT, Stakeholder Management, Cross-Functional Leadership, Roadmapping Tools, Jira, Confluence, Figma, Miro, Notion

Experience

Juniper Networks
Aug 2025 – Present

AI Product Manager
Bridgewater, NJ

- Own product strategy and roadmap for enterprise AI, analytics, and intelligent automation solutions, aligning customer pain points, business priorities, technical feasibility, and measurable outcomes.
- Define and prioritize AI-powered product capabilities and platform enhancements, contributing to 15+ enterprise integrations that expanded interoperability across business systems and data workflows.
- Led a post-sale process and systems improvement initiative covering customer onboarding, Professional Services coordination, expansion tracking, and the link to revenue processes.
- Gathered requirements from business and technical stakeholders and converted them into prioritized capabilities, user stories, acceptance criteria, process flows, and delivery plans.
- Partnered with Salesforce and integration teams on data fields, status transitions, ownership rules, workflow behavior, and reporting; coordinated data validation and downstream revenue-process impact.
- Ran backlog refinement, sprint planning, defect triage, and release readiness; supported UAT, rollout, adoption, and post-release feedback collection.
- Separated launch-critical requirements from longer-term improvements and tracked decisions, risks, and dependencies.

C3.ai
Sep 2022 – Jul 2024

Product Manager – AI & Data Platforms
Redwood City, CA

- Managed enhancements for enterprise analytics, data-accessibility, and workflow platforms, turning business needs into prioritized requirements, release plans, and measurable outcomes.
- Delivered self-service reporting that reduced manual reporting effort by 37% and removed recurring dependency on manual data preparation.
- Increased internal platform engagement by 28% through usability enhancements, workflow redesign, and clearer navigation of high-frequency experiences.
- Reduced rework by 22% by working with UX and engineering from discovery through release on clearer user stories, acceptance criteria, and design alignment.
- Ran customer-feedback and product-adoption programs that improved roadmap accuracy by tying user needs, usage patterns, and platform constraints to prioritization.
- Tracked adoption, retention, feature usage, and workflow metrics to evaluate releases and prioritize improvements; defined success measures for experiments and iterative releases.
- Facilitated Agile ceremonies, UAT, defect triage, and release readiness; presented status, metrics, risks, and outcomes to stakeholders.

Cloudera
Aug 2018 – Jul 2022

Associate Product Manager

- Supported digital-transformation and product-modernization programs across enterprise analytics and workflow platforms, improving user experience, operational visibility, and process efficiency.
- Gathered and documented requirements through stakeholder interviews, workshops, and current-state assessments; wrote functional specifications, use cases, process flows, and user stories with clear acceptance criteria.

- Managed and prioritized product backlogs with business owners and engineering using MoSCoW and value-versus-effort scoring, keeping scope aligned to release goals and business priorities.
- Developed KPI dashboards and analytics frameworks (SQL, Tableau, Power BI) that improved decision-making, trend monitoring, and detection of process-performance issues.
- Automated recurring reporting and operational workflows, reducing manual effort and improving consistency and timeliness.
- Planned and coordinated UAT: wrote test scenarios, tracked defects through resolution, and confirmed release readiness with business stakeholders.
- Partnered with developers, QA, and architects in Agile/Scrum ceremonies (sprint planning, refinement, reviews, retrospectives) to keep delivery on track across distributed teams.
- Wrote release notes, user guides, and change communications, and collected post-release feedback to shape follow-on enhancements.

Mu Sigma *Jul 2016 – Jul 2018*
Product Analyst *Bangalore, India*

- Supported analytics and decision-science engagements for enterprise clients, translating business problems into data requirements, analysis plans, and reporting deliverables.
- Gathered requirements through stakeholder interviews and workshops; documented process flows, use cases, and functional specifications for analytics solutions.
- Built dashboards and recurring reports (SQL, Excel, Tableau) to support client decision-making and track key operational and business metrics.
- Cleaned, transformed, and validated data from multiple sources, reconciling discrepancies to keep reporting accurate and trusted.
- Partnered with data science and engineering teams to turn analytical findings into clear, actionable recommendations for client stakeholders.
- Presented findings, trends, and insights to client teams, and documented assumptions and methods for repeatable analysis.

Projects

WonderWordAI *Aug 2026 – Present*
AI Product Lead *Fremont, CA*

- Launched an AI-powered K–5 reading coach (PWA + FastAPI) from concept to 100+ beta families in 4 weeks, with 80%+ activation, 65% free-to-paid conversion, and 90% annual retention.
- Lead product strategy and roadmap across 3 MVPs (Sept–Mar 2027) targeting 2,000+ users and $4.8K MRR, with pricing validated through 50+ voice-of-customer interviews.
- Manage a cross-functional team of 8 engineers and 2.5 FTE hires; set up product processes, metrics tracking (Amplitude, Mixpanel), and go-to-market strategy.
- Designed a 3-tier freemium pricing model with annual billing; validated unit economics at $5–8 cost to serve and 47–61% gross margin. Recruiting 5+ school pilots (Q4 2026), LTV:CAC target 3:1+.

PM Accelerator *Aug 2026 – Present*
AI Lead Product Manager (Advisor) *Miami, FL*

- Lead product strategy for an early-stage Generative AI platform: target users, problem statements, MVP scope, PRDs, roadmap priorities, and launch outcomes.
- Run customer discovery and market-validation interviews; reduced initial feature scope by 30% by separating critical MVP capabilities from lower-priority ideas.
- Evaluate LLM options (GPT, Claude, Gemini, open-source) on capability fit, response quality, cost, latency, scalability, and integration effort.
- Competitive analysis across 8+ AI products; define AI success measures (response relevance, task completion, engagement, latency) and data considerations for retrieval workflows (quality, privacy, compliance, freshness).

Interviewer Prep Coach — AI Recruiting Product Concept *(Miro, Figma, Lovable prototype)*

- Ran discovery with recruiter, interviewer, and hiring-manager personas; designed an AI-assisted Prepare → Align → Close-the-loop workflow and wrote a 22-section PRD with MoSCoW scope, user stories, acceptance criteria, and V1–V3 rollout.
- Set responsible-AI guardrails (AI summarizes approved data and suggests job-related questions; never scores candidates or recommends hires) and a north-star metric of 70% of interview loops with complete feedback within 24 hours.

Uber Eats Order Resolution — Competitive Strategy & PRD *(Notion, Lovable)*

- Analyzed DoorDash vs. Uber Eats across features, UX, segments, and monetization using earnings filings and third-party benchmarks; identified post-failure order resolution as the defensible wedge (order accuracy 88% vs. 98%).
- Authored a full PRD and built an interactive prototype showing the pre-authorization mechanic, abuse guardrails, and cost attribution, with success metrics gated on operational accuracy.

Alert Triage Copilot — AI Retrieval for NOC Alerts *(Claude)*

- Scoped an AI retrieval layer for network alert triage: product brief, phase-1 PRD with acceptance criteria, and a working prototype on public system-log data.
- Defined an automation ladder with promotion/demotion thresholds and a metrics tree with a counter-metric and hard-stop guardrail; re-ran retrieval evaluation as a chronological split after the cumulative measure proved misleading, which changed phasing and requirements.

Education

- **Post Graduate Program in Data Engineering** - Purdue University / Simplilearn, 2025
- **MBA** - IEC University, Himachal Pradesh, 2018
- **BBA** - Amity University, Noida, 2014

Certifications

- **Certified Scrum Product Owner (CSPO)**
- **IBM AI Product Manager**
- **Certification in Data Analytics**
